

Compact Camera Unit

An example of this product can be seen below; however the flexibility and adaptability of the unit means that it can be easily tailored to suit customer requirements. The lightweight, compact black and white camera is fully portable, offering imaging solutions in inaccessible areas. The unit can also be used as a fixed monitoring device. Available as a stand-alone product, or as part of an integrated system, the unit can be supplied with an optional lighting ring, additional handling/mounting features and/or a standard electrical connector upon request. An IP65 variant is also available.
